

VISIONAIR CARBONMAX

AIR CLEANER

The VisionAir CarbonMax filters various types of air pollutants. This air cleaner's most important function is to remove, volatile organic components, unpleasant odours and harmful gases from the air.

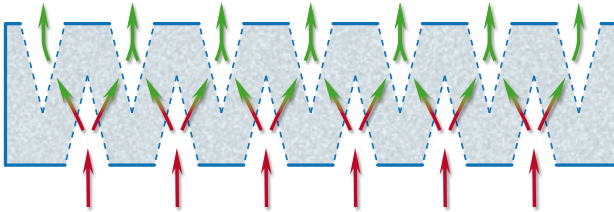

The VisionAir is available in two versions, VisionAir¹ and VisionAir², and is easy to install. VisionAir¹ and VisionAir² can be mounted both to and in the ceiling. VisionAir¹ can also be mounted to the wall, or put on a stand.

FILTERING PRINCIPLE

The VisionAir CarbonMax contains a unique filter system, which cleans indoor air in two phases. The pre-filter catches the coarse dust particles and other pollutants, such as hair and skin flakes.

The CarbonMax filter, the core of the system, is an activated carbon filter. Activated carbon adsorbs volatile organic components, unpleasant odours and harmful gases from the air.
